# Manufacturing Process – AADHIRA STEEL

Contributor of a robust infrastructure, a trusted dealer, the pioneer in innovative manufacturing, and with a commitment of 'no compromise in quality' – We are AADHIRA STRONG, the name in TMT Bars.

'AADHIRA' in English translates to STRONG. And we take pride in the fact that in such a short span, we have managed to bravely stand out among our competitors.

Incorporated in the year 2003, AADHIRA STEEL is based out of Raipur, Chhattisgarh, with a supply focus extending across India. We aim to provide power and strength not just to construction but to the whole nation through our supreme quality products.

Since incorporation, our product has been the preferred choice of engineers. The reason is that we offer high strength, high ductility, and high energy absorption capacity in our TMT bars. The rib patterns in our bars are designed scientifically to give them high tensile strength and make them earthquake-resistant. We commit to minimizing waste through product testing and proper labeling. Our processes and products are compliant with Indian and international industry standards. We are always upgrading to the latest technology, ensuring we stay ahead with every advancement in the industry.

# WHY CHOOSE US

Meets Industry Standards

Superior Concrete Bonding

Unmatched Strength

APPROVED **RIB** PATTERN

Cost-Effective & Efficient

Built to Last

Engineered for Load-Bearing

**QUALITY AND ENGINEERING  
YOU DESERVE**

The right  

# BEGINNING

is A Blessing

Our high-strength TMT bars are engineered to provide  
**UNMATCHED DURABILITY, FLEXIBILITY  
AND STRUCTURAL INTEGRITY**  
making them the ideal choice for various construction projects.

**RESIDENTIAL**  
Buildings

**COMMERCIAL**  
Structures

**FLYOVERS &  
BRIDGES**

**DAMS & INFRA-  
STRUCTURE**

# ECONOMICAL SUSTAINABLE

AADHIRA STRONG TMT 600+SD helps optimize construction costs by offering exceptional strength with reduced material usage. This means fewer resources are needed, leading to cost savings on raw materials, transport, and labor. Additionally, the long-lasting durability of our TMT bars minimizes maintenance costs, making it a smart investment for any construction project.

**TRUSTED  
FOR EVERY  
STRUCTURE**

**AADHIRA STRONG TMT 600+ SD** 

AADHIRA STRONG TMT 600+SD is synonymous with trust and reliability. With years of expertise in the steel sector, we are committed to delivering TMT bars that consistently meet performance expectations. Whether for residential, commercial, or infrastructure projects, our steel guarantees safety, strength, and longevity.

Choosing AADHIRA STRONG TMT 600+SD means choosing a **PARTNER IN EXCELLENCE**, supporting your construction needs from foundation to final execution.
